

**ENVIRONMENTAL
WATER SYSTEMS®**

**CRAFTED IN CALIFORNIA
SINCE 1987.**

TASTE DOES NOT EQUAL HEALTH OR QUALITY. IF IT DID, MCDONALDS FRIES AND OREOS WOULD BE HEALTH FOODS. *(WE WISH.)* YOUR WATER MIGHT TASTE OKAY, BUT THAT DOES NOT MEAN THE WATER IS FREE OF CONTAMINANTS. THERE ARE A LOT OF THINGS WE CAN'T SMELL OR TASTE THAT HANG OUT IN OUR TAP WATER. TAKE STREAMS FOR EXAMPLE - IT MIGHT BE COLD, REFRESHING, AND DELICIOUS, BUT THEN YOU HAVE TO GO TO THE DOCTOR FOR PARASITE MEDICATION A WEEK LATER. ONLY 91 CONTAMINANTS OUT OF THE ESTIMATED 80,000 ARE REGULATED BY THE CLEAN WATER ACT. BUT NEVER FEAR. WE PRIDE OURSELVES ON PROVIDING THE HIGHEST QUALITY, LONGEST LASTING WATER FILTRATION AVAILABLE TO **PROTECT OUR HEALTH.**

Frequent Filter Replacements

Limited Warranties

In 1987, we set out to make a difference to our health and environment. We created:

THE HIGHEST QUALITY, LONGEST LASTING WATER FILTRATION THAT PROTECTS OUR SKIN, OUR HAIR, OUR HEALTH & OUR HOMES.

THE BEST MATERIALS

We use only the highest quality materials sourced from the United States of America and South America (with the exception of genuine John Guest fittings on our sink filtration systems, which are made in the United Kingdom). Simply put, we use the best materials available and craft each system by hand in California.

THE EWS DIFFERENCE

EWS is not about the next gimmick. We spend our money on research, development, and quality manufacturing – not advertising. We are not an MLM, door-to-door, or fly-by-night company focused on closing a sale. We do not compete on price. We take pride in our customer service and satisfaction. At our level of quality and craftsmanship, our customers feel safe knowing that EWS is providing them and their families with truly clean, healthy water they can trust and enjoy for years to come.

BUILT TO LAST

Every single water filtration appliance we make is built with value in mind. We do not compromise quality in order to compete on price. Our standards are the highest in the industry, and we have the customer satisfaction and impeccable track record that makes our fastidiousness so worthwhile. We have many appliances over 20 years old still protecting families. That kind of quality is a rarity, and we take pride in the quality of our materials, our workmanship, and our customer service.

Our whole home filtration appliances are 100% made in America and once installed, you simply set and forget it. The only maintenance you ever need to do is change the filtration media (the filter inside the appliance) once every 7-10 years, depending on your water usage and conditions. Top-notch protection really is that easy.

WATER IS IN OUR BLOOD.

I created EWS in 1987 after the birth of my daughter. Her pediatrician told us to open the bathroom window, keep the bathroom door open, and use any vents available so she would not breathe the chlorine that would aerate from the shower, as it would be bad for her lung development. Upon further research, I discovered three things:

One, that it wasn't just an issue of chlorine and the bad taste it produces. I found there was a whole host of other substances forming a chemical cocktail in our tap water. Chlorine, its byproducts, and many other chemicals present in our water disrupt the body's natural processes. Many are carcinogenic or endocrine-disrupting, contributing to cancer, thyroid issues, weight gain, diabetes, and birth defects. Two, that it was necessary to filter water for drinking, skin absorption and inhalation. And three, that bottled water and most filtration available was based on the deception of taste only, and not the actual quality of the water we use to live and thrive.

I had a great career in finance for major firms in New York City, but I knew this was my calling. I wanted to make a difference. I am passionate about providing the highest quality, long-lasting water filtration so we can all enjoy clean water that will help our skin and hair, help prevent cancer by removing chlorine and other carcinogenic compounds, and alleviate allergy and asthma symptoms. I am proud to say that EWS is the top choice again and again for individuals and families that deal with disorders that can be reduced or controlled with the help of our filtration appliances.

I love how many things come full circle. My grandfather owned the West End Mineral Water Company in New York City in the 1920s and 30s. Perhaps it was only natural that I would provide quality water to people two generations and nearly a century later.

HOWARD, OUR CEO, WITH A PICTURE OF HIS FATHER AND GRANDFATHER, OWNER OF WEST END MINERAL WATER CO. IN NEW YORK CITY. CIRCA 1930.

PROTECT YOURSELF, YOUR FAMILY &
FROM CHLORINE, CHLORAMINE & MORE
80,000 CHEMICALS IN YOUR TAP WATER

THE SPECTRUM IS THE MOST VERSATILE AND
BEST-SELLING WHOLE HOME FILTRATION
APPLIANCE IN THE USA. AND FOR GOOD
REASON.

"How healthy do you want to be? Environmental Water Systems whole home filtration appliances are a definitive component to a healthy home environment. Made by hand in the United States. Meticulously engineered to the highest standards, using the latest innovative technology and highest quality materials. Backed by our award-winning customer service and support. We never skip. And neither should you.

The President's Cancer Panel annual report, *Reducing Environmental Cancer Risks: What We Can Do Now*, states the importance of removing contaminants from your water: "Individuals and families have many opportunities to reduce or eliminate chemical exposures...filtering home tap water or well water can decrease exposure to numerous known or suspected carcinogens or endocrine-disrupting chemicals."

Since 1987, EWS has pioneered central water filtration and is the leader in whole home filtration appliances, trusted by hospitals, health care centers, military, high-end hotels, and thousands of private homes worldwide. Enjoy the hassle-free convenience of clean, filtered water to every sink and shower in your home and reduce your exposure to thousands of unregulated contaminants.

EWS SPECTRUM

WHOLE HOME WATER FILTRATION AND CONDITIONING

World-class EWS filtration and conditioning performance allows you to enjoy clean, odor-free filtered water for drinking, cooking, showering, and bathing from every tap in your home. Conveniently, there are no frequent filter replacements. Simply change the filtration inside the tank every 7-10 *years*. That's it.

The Spectrum is a versatile whole home filtration appliance that suits 90% of homes, is easy to install, and maintains itself.

most popular

most versatile

REAL PROTECTION. World-class EWS filtration performance protects you, your loved ones, and your home from chlorine, VOCs, pesticides, dyes, fuels, and many more contaminants present in tap water. Meets or exceeds FDA, NSF, ANSI, and CA State compliances.

HARD WATER HELP. Those with hard water can select the EWS Spectrum, which provides filtration plus salt-free, chemical-free conditioning. People with naturally soft water (or who use a salt softener) can select the CWL Spectrum, which is filtration only.

EWS CHLORAMINE WHOLE HOME FILTRATION AND CONDITIONING FOR CHLORAMINE

Chloramine is a corrosive compound of chlorine and ammonia that requires specialized treatment in order to thoroughly remove it. Chloramine is lethal to marine life, causes rashes and skin disorders, and is known for corroding plumbing and appliance connections. The EWS Chloramine series was engineered specifically for the removal of this chemical, as well as its byproducts, pesticides, VOCs, fuels, dyes, and other contaminants.

Enjoy the health and convenience of chloramine-free, chlorine-free, filtered water from every sink and shower in your home.

Comes in two sizes to suit various home and family requirements.

REAL PROTECTION. World-class EWS filtration performance protects you, your loved ones, and your home from chloramine, chlorine, VOCs, pesticides, dyes, fuels, and many more contaminants present in tap water.

PICK A SIZE. There are two sizes available – the 1465 and 1865. We recommend the 1465 for most homes with up to 4 people and up to 3 bathrooms. For larger homes, larger usage, and higher chloramine content, we recommend the 1865.

I RECENTLY PURCHASED MY SECOND EWS UNIT. A CS-1354-7000 SPECTRUM WHOLE HOUSE SYSTEM. THE WHOLE FAMILY IS PLEASED WITH THE QUALITY OF THE NEW UNIT. I WAS IMPRESSED WITH THE EASE OF INSTALLATION AND THE INSTALL INFORMATION INCLUDED...SETTING THE TIME AND DATE WAS NOT DIFFICULT AT ALL. THIS IS THE SECOND UNIT I HAVE PURCHASED, THE FIRST UNIT AN EWS 1054 I BOUGHT IN 1993 AND IT PREFORMED SO WELL AND RELIABLY THAT'S WHY I BOUGHT THE REPLACEMENT. I WOULDN'T WANT ANYTHING ELSE.

—KIRK SCHAB

ESSENTIAL DWS

ADVANCED DRINKING WATER SYSTEM

The ESSENTIAL is the first of its kind. It may look simple from the outside, and that's the point – it is easy to install and easy to maintain (simply “twist and click” to change out the filters once per year, no tools needed).

Inside are the most advanced, USA-made, full bed depth filters available. They remove and reduce chlorine, chloramine (the first and only drinking water system to do this), VOCs, pesticides, pharmaceutical residues, lead, cysts, rust, sediment, and much more. Ideal for drinking, cooking, watering plants, and making your morning coffee or tea. Ultraviolet for microorganism protection is available.

most popular

REAL PROTECTION. World-class EWS filtration performance protects you and your loved ones from chlorine, chloramine, VOCs, pesticides, dyes, fuels, rust, cysts, lead, and many more contaminants present in tap water. Meets or exceeds FDA, NSF, ANSI, and CA State compliances.

KEEP THE MINERALS. We keep the healthy, natural calcium and magnesium minerals in the water, yet remove everything that shouldn't be in your water. This keeps the water from becoming too “aggressive” and many people prefer the taste of mineral water. If you do not, look to our RO systems.

ESSENTIAL RO

REVERSE OSMOSIS FILTRATION SYSTEM

The ESSENTIAL RO is the first of its kind. Easy to install and easy to maintain, this RO system contains the most advanced, USA-made, full bed depth filters available today. They remove and reduce chlorine, chloramine, VOCs, pesticides, pharmaceutical residues, lead, cysts, rust, sediment, heavy metals, minerals, fluoride, and more.

RO water is right for people who have high heavy metals in their tap water, are allergic to fluoride, or simply prefer the flat taste of reverse osmosis water. Otherwise, the DWS (left) is often the perfect choice.

The ESSENTIAL RO comes in three and four-stage versions, with or without ultraviolet.

REAL PROTECTION. World-class EWS filtration performance protects you and your loved ones from chlorine, chloramine, VOCs, pesticides, dyes, fuels, rust, cysts, lead, heavy metals, and many more contaminants present in tap water.

RO VS. DWS. The RO system removes minerals and heavy metals, whereas the DWS does not. The RO also requires a storage tank and must manufacture water, whereas the DWS provides water on demand and does not take up extra space with a storage tank. Often the DWS is the right choice.

“

YOUR LEVEL OF AFTER SALES CUSTOMER SERVICE HAS MADE OUR DECISION TO UPGRADE TO A NEWER EWS SYSTEM RATHER THAN GO WITH A DIFFERENT MANUFACTURER. THANKS AGAIN FOR PROVIDING AN EXTREMELY WELL ENGINEERED AND BUILT PRODUCT THAT CONTINUES TO PROVIDE US WITH THE BEST TASTING WATER THAT IS EVEN BETTER THAN BOTTLED. THANKS AGAIN.

—ROB GIBBINS

EWS 1354

WHOLE HOME FILTRATION AND CONDITIONING

Our flagship whole home filtration appliance, the EWS 1354 has evolved over the years and maintained its place as the most popular, most advanced filtration appliance available, year after year.

The EWS 1354 is designed for families of four or less with a 3/4" or 1" plumbing size. It provides healthy, filtered water to every sink and shower in the home without any hassle, maintenance, or frequent filter replacements. from every sink and shower in your home.

Comes in various sizes and flow rates to suit different family, home, and plumbing size requirements. This series comes with a real stainless steel cover.

flagship product

REAL PROTECTION. World-class EWS filtration performance protects you, your loved ones, and your home from chlorine, VOCs, pesticides, dyes, fuels, and many more contaminants present in tap water. Meets or exceeds FDA, NSF, ANSI, and CA State compliances.

PICK A SIZE. There are several sizes available to suit various flow rate requirements, family sizes, and plumbing sizes. Selecting the correct size is easy and EWS customer service is available to help you if you should need it.

7 MOST IMPORTANT BENEFITS OF EWS WATER FILTRATION

1. PROTECTION FROM INGESTING, ABSORBING, & INHALING CARCINOGENIC (CANCER-CAUSING) WATER CONTAMINANTS.
2. HASSLE-FREE, SELF-CLEANING, & USER-FRIENDLY.
3. NO MAINTENANCE OR FILTER REPLACEMENTS ON WHOLE HOME FILTRATION APPLIANCES FOR 7-10 YEARS.
4. ALLEVIATE SYMPTOMS OF ASTHMA & ALLERGIES BY ELIMINATING IRRITATING CHEMICALS FROM SHOWER & BATH WATER.
5. ELIMINATE DRY SKIN, DRY HAIR, & SKIN IRRITATIONS CAUSED BY CHLORINE.
6. ELIMINATE EXPENSIVE & WASTEFUL PLASTIC WATER BOTTLES. FILL UP YOUR OWN BOTTLE WITH FILTERED WATER.
7. UNPARALLELED, AWARD-WINNING CUSTOMER SERVICE, CUSTOMER SATISFACTION, & TECHNICAL EXPERTISE. **TOP PERFORMING, USA-MADE FILTRATION IS ALL WE DO.**

YOU ASKED, WE ANSWER...

IS HARD WATER HARMFUL?

Hard (mineral) water is beneficial to humans, plants, and animals. It can be harmful to plumbing and appliances because excessive hardness minerals can cause scale build-up, eventually blocking pipes and affecting the performance of appliances like dishwashers and water heaters. The EWS Series is designed to offer all of us the best of both worlds — keeping the healthy natural minerals in our water while preventing them from causing problems with our homes.

WHAT IF I HAVE WELL WATER?

We have specialty systems to handle various well water issues, such as pH or iron. Some wells may have a whole host of problems, and others may have no issues whatsoever, in which case we will not recommend any treatment. The only way to tell is by getting your well water tested, which is important to do every year. Be sure to use a qualified, independent lab for unbiased and objective results.

ARE SMALL WHOLE HOME WATER FILTRATION SYSTEMS EFFECTIVE?

At bare minimum, a typical home requires at least 10 gallons per minute (gpm) of available water. Small tanks with small valves have flow rates of only 7-8 gallons per minute. The other issue is that there is not enough filtration media and contact time with the water to filter it properly (this is especially true as it pertains to chloramine, as chloramine requires 3x the contact time – meaning larger tanks and more filtration media – to be effectively removed). You may get a taste and odor improvement, but it may not be truly removing 99%+ of chlorine and contaminants such as pharmaceutical residues, VOCs, THMs, and more.

WHO INSTALLS YOUR SYSTEMS?

A qualified handyman or licensed plumber. All our systems come with a step-by-step installation guide. If you have any questions or need any help along the way, please call our wonderful technical support staff.
