

ECONOMY

The Trane XR series of air conditioners and furnaces offer competitive options for year-long comfort.

STANDARD

Pair a Trane XL outdoor unit with a furnace featuring a four-speed blower motor and multi-stage heat.

PREMIUM

Combine a Trane XV outdoor unit with a variable speed furnace with communicating technology.

EFFICIENT IN ENERGY AND COST

Heating and cooling can account for more than half of a home's total utility bill. When you install high-efficiency Trane systems in the homes you build, you're not only integrating a more sustainable system, you're installing one that will save the new homeowner money over the product's lifecycle, ultimately, minimizing the total cost of ownership as well as the home's carbon footprint.

To learn more about Trane's comprehensive portfolio call your local Trane representative.

Seasonal Energy Efficiency Ratio (SEER) measures air conditioning and heat pump cooling efficiency. A higher SEER rating means greater energy efficiency.

ComfortLink™ II control is an innovative and intuitive touch-screen control that has the ability to communicate with other specific Trane heating and cooling products to ensure your home's energy use is at peak efficiency.

Outdoor Unit	XR14	XL18i	XV20i
